

Food waste compliance for 2027

EASY PROCESS

As per the National Waste Management Strategy 2020, aiming for 100% organic waste diversion by 2027.

50-litre drums

Food waste drums are placed next to every dustbin in the kitchen to separate food waste

- Lines are marked inside the drums
- 3 scoops of bokashi are added at each line

Measured doses of bokashi

Bokashi comes in an 8kg bag that will treat 12 x 50-litre drums of food waste

- Bokashi stops food waste from rotting and smelling

Food waste collection

Food waste drums are weighed and recorded on the Bokashi Bran® App before being emptied into the truck.

- Drums must be washed by the customer before going back into the kitchen
- Monthly reports of collections and drum weights
- Annual carbon footprint savings certificate

Benefits of implementing Bokashi Bran System

COST REDUCTION or COST NEUTRAL *

Less wheelie bins of general waste (up to 40% less)

- Typically 40% of commercial kitchen waste is food waste.
- Future penalties for dumping food waste in general waste. 2027 - zero organics to landfill legislation.
- Identify avoidable food waste and reduce food costs.

*T&C apply

IT'S GOOD FOR THE PLANET

- Reduced waste at the landfill
- Reduced greenhouse gas emissions by 98%
- Increase recycling of plastic, tin, and glass
- Improved soil quality
- Higher water-holding capacity of soil
- Less groundwater contamination
- ESG reporting contribution

REVOLUTIONARY PRODUCT IN COMPOSTING

Safe to compost with Bokashi Bran®

- Cooked food
- Meat product (proteins)
- Dairy
- Absolutely ALL food waste can be composted

COMMUNITIES WITH NO FLIES OR RAT ISSUES - WELL-MANAGED WASTE

- Job creation
- Food security
- Clean environment
- Reduced waste

- Liquid ban from landfill (2019) - any waste with a moisture content above 40% is banned from landfill
- Waste with a pH value of <6 or >12 - is banned from landfill. Putrefied food waste = 4pH
- National Waste Management Strategy 2020
- Carbon Tax Act 15 of 2019
